

Model-Based Identification of POTS Local Loops for DSL Connectivity Prediction

by

Takeshi Ikuma

Thesis submitted to the Faculty of
The Bradley Department of Electrical and Computer Engineering
Virginia Polytechnic Institute and State University
in partial fulfillment of the requirements for the degree of

Master of Science

in

Electrical Engineering

APPROVED

Dr. A. A. (Louis) Beex, Chairman

Dr. Sedki M. Riad

Dr. Pushkin Kachroo

July 2001
Blacksburg, VA

KEYWORDS: System Identification, POTS Local Loop, Twisted Pairs, Transmission Line, MODE-WRELAX Algorithm, MODE-Type Algorithm, Digital Subscriber Line
