Dear Christine, Eric, Jeff,

Haitham has just submitted his dissertation. His work centers around the analysis of the database he compiled and described in the paper that we coauthored. The Earthquake Spectra publication is part of the dissertation. We need an email from you (if you agree) indicating that you agree that this be part of the dissertation. A short reply to this email would be sufficient.

For your information, this is what is listed in the "attribution" section of the dissertation.

ATTRIBUTION

All the work I performed for my dissertation was done under the advising of Professor Adrian Rodriguez-Marek. Accordingly, he is my co-author on all articles. Other than my advisor, I have three additional co-author on the article presented in Chapter 3. Mr Jeff Bayless and Dr Christine Goulet developed the first version of the processing protocol. This "beta" version was then expanded and fully automated during the course of this study. Dr Eric Thompson worked on estimating the different distance measurements (presented in Appendix A) used in the analysis of Chapter 5.

Best regards,

Adrian

Adrian Rodriguez-Marek, Ph.D.

Adrian and Haitham,

That sounds fine to me. You have my approval. Thanks.
