INTRODUCTION

On September 9 I started work in Buckingham County as Assistant County Agent under County Agent J. G. Hamaker. He stopped work on September 31 and I was appointed County Agent October 1.

Mr. Hamaker has written a narrative report covering ten months of this year's work, and as most of the projects and demonstrations in the county had been completed by September 31 he has covered them in his report.

After giving a brief resume of my two months work I will give a brief discussion of the conditions in the county as I understand them from observation during my two months work and as a native of the county.

Report of Two Months Work in the County.

After Mr. Hamaker left the county a campaign against striking smut or bunt of wheat was started. Nine hundred (900) postcards were mailed to the farmers warning them of the dangers and mode of infection of this disease and giving the method of treatment for prevention. The result was very encouraging as indicated by the amount of copper carbonate sold in the county.

There were a number of requests for demonstrations on the treatment of sheep for stomach worms. In these demonstrations 263 sheep were treated.

One farmer called up and said he had been losing a number of sheep and asked me to come down and see if I could find what was wrong. After examining the sheep and consulting with the farmer his trouble was diagnosed as stomach worms. He had lost 15 ewes and 18 lambs in a little over a month's time. After the remaining 65 sheep were treated, not another one died. A small lamb that seemed to be nearly dead when these sheep were treated even lived. The farmer was very much pleased with the result.

About two weeks time was devoted to encouraging the use of lime. Three cars have been bought and two more are to be ordered in December. -The Agent was able to meet and talk with many farmers unknown to him, in doing this work.

A number of farmers planted Korean Lesperdoza for the first time this year. Nine demonstrations in saving the seed, with a pan attached to the cutter bar of a mower, were given, 2105 pounds of seed were saved. The farmers were very much pleased, in every case, with this crop. In one case after the farmer had expressed his pleasure, three or four times, his son remarked, "This is the first time you have ever planted and saved a crop like the County Agent directed and as you are so well pleased it looks like you would do what the Agent says about other things." After looking at his son, in surprise, for a minute the father remarked, "I guess I will".

Lesperdoza is going to be a great improvement crop for the farmer with acid land who has to haul lime a long distance.

Ten calves were vaccinated for black leg for one farmer who had lost one from this disease. No more deaths resulted.

The interest in co-operative marketing of tobacco seems to be gradually increasing, but this interest is not general, as indicated by the attendance at organization meetings. The low price of tobacco is causing a lot of comment, however.

The rest of the two month's time was devoted to miscellaneous matters, such as writing letters, making calls (requested by farmers on every conceivable subject except what you might expect or be prepared to answer) studying bulletins and similar material

DISCUSSION OF THE FARMERS POSITION IN THE COUNTY

Conditions in General in the County October 1, 1931.

An unusually good growing season following one of extreme drought resulted in the highest wheat yields in the memory of the oldest farmers. The season was also especially favorable for the seeding and development of spring oats, the average yield of which was also high for the county. The local threshing machines ordinarily take care of these crops by about the first of August, but this year many of them were still threshing the latter part of August and a few were still operating in September. In a few cases the wheat was damaged by rain, but a majority of the wheat was dry and in good condition when threshed. In spite of the fact that striking smut was prevalent throughout the state only a relatively small percent of the crops in the county were damaged by this disease. This was no doubt due to the fact that about 75% of the farmers treated their wheat with copper carbonate.

The hay crop was above average and more wild grasses and weeds were cut for feed for livestock than in years. The tame hay consisted mostly of timothy, red top, and orchard grass. There was practically no clover hay due to the drought last summer. The yield of alfalfa hay was good and the farmers who were so fortunate as to have alfalfa are well supplied with good legume hay. Peas and soybeans also made good yields of hay. The weather for curing this type of hay was ideal, resulting in the best quality peas and bean hay in years. A few farmers had Korean Lespedeza and cut some of it for hay and they were surprised at its yield and quality.

More peas were gathered or otherwise saved for seed this year than ever before. In a few cases peas bought from the Carolinas failed to produce pods or seed.

The corn crop was a little above average. The corn on the high land being better than average while that on the lowground was about average. The corn was damaged very little by hail, but the early corn was so badly blown down by storms that practically all of it had to be cut by hand. The quality of most of the corn was good, there was a lot of rotten corn in that damaged by storms.

-4-

The conditions were favorable for planting tobacco and the farmer got a higher percent of his intended acreage planted than usual. In most cases (about) the usual amount of commercial fertilizer was used. There were very few tobacco horn worms, but the attack of bud worms and flea bugs was unusually severe. The damage from hail was confined to one small area in the county. The conditions for harvesting and curing the crop were about normal.

There were more and better home gardens planted than ever before. This was no doubt caused by the shortage of feed due to the drought last year, the requirement of having a home garden to get a government loan, the free distribution of garden seed by the Red Cross, propaganda by the Extension Service and similar agencies. Most of these gardens were well cared for and produced well.

The apple crop was large but in most instances the trees were poorly sprayed or not sprayed at all and the fruit is badly diseased.

The conditions for livestock were rather better than average. However, pastures were slow in getting started after the effects of last years drought and most of the livestock came out of the winter in a very thin condition.

The Attitude of the Average Farmer Toward these Conditions.

From the foregoing report it would seem that the farmer was in a very good position, but the price of farm commodities and the cost of the goods and conditions that determine the standard of living of the farmer have not been considered.

Actually the farmer's situation varies from the state in which he cannot sell his crops for a price high enough to pay him for the labor and materials, (paid for when these commodities were higher than they are today) required to produce the crop or commodity; to one in which the farmer on the better types of land and by improved methods produces high yields, and sells his crops more or less directly to the consumer, is able to make a fair profit.

As the latter group is very small there is little reason to be surprised at the number of farmers who say they are not making any money or that a few are saying, "Let the state take my land for taxes, I can't make enough on it to pay them," or, "Let the government take my crop for the loan made me on it, to pay the loan." There are a lot of farmers that haven't money to pay their taxes and buy suitable clothing. They are trading produce for many necessities and doing without others. The average farmer feels like he is losing money by farming.

Plans Made by the Farmer to Meet these Conditions.

The more conservative and better educated farmers are reducing their standard of living, the cost of operation, producing better quality products and paying more attention to marketing them.

But the great majority of them are complaining of hard times, saying their products are not worth anything anyway so why put more time on them to improve their quality, that it doesn't pay to use fertilizer or improved methods as there is already an overproduction of everything. They are so discouraged that they don't know which way to turn. The farmer certainly needs a leader and an advisor at this time.

ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is to be used by county extension agents, such as county agricultural agent, home demonstration agent, club agent, and negro agent, reporting on their respective lines of work.

State Virginia County Buckingham
Report of J. G. Hamaker County Agricultural Agent
R. S. Ellis Asst. (Home Agent & Agent)
From December 1, 1930 to November 30, 1931

If agent has not been employed entire year, indicate exact period. Agents resigning during the year should make out this report before quitting the service.

READ DEFINITIONS, PAGE 3

COUNTY AGENT ANNUAL REPORT.

Approved:

Date _____

State or District Supervisor.

Date _____

State Extension Director.

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT

The annual report should be a summary, with analysis and interpretations, for presentation to the people of the county, the State, and the Nation of the extension activities in each county for the year and the results obtained by the county extension agent, assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agent and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support of extension work.

Separate statistical and narrative reports are desired from each leader of a line of work, such as county agricultural agent, home demonstration agent, boys' and girls' club agent, and negro agent, regardless of title. Where an assistant agent has been employed a part or all of the year, a report on his or her work should be included with the report of the leader of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked. Where two or more agents are employed in a county, each a leader of a line of work, statistics should not be duplicated.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. The report to the Washington office should be sent through the State extension office.

NARRATIVE SUMMARY

The narrative report should summarize and interpret the outstanding results accomplished and the extension methods used, under appropriate subheadings, for each project. Every statement should be clear-cut, concise, forceful, and, where possible, reinforced with necessary data from the statistical summary. Use an interesting style of writing, giving major accomplishments first under each project. Give extension methods fully relating to outstanding results only, and where practicable illustrate with photographs, maps, diagrams, blue prints, or copies of charts and other forms used. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs, and reasonably good margins. The pages should be numbered in consecutive order.

The following outline is suggestive of how the narrative report may be clearly and systematically presented. Each agent should adapt the outline to the situation and the work to be reported.

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT

- I. Cover and title page.
- II. Table of contents.
- III. Status of county extension organization.
 - (1) Form of organization—changes and development.
 - (2) Function of local people, committees, or project leaders in developing the program of work.
 - (3) General policies, including relationships to other organizations.
- IV. Program of work; listing goals set up, methods employed, and results achieved.
 - (1) Factors considered and methods used in determining program of work.
 - (2) Project activities and results.

(a) Cereals.	(m) Dairy.
(b) Legumes and forage crops.	(n) Other livestock.
(c) Potatoes, Irish.	(o) Farm management.
(d) Cotton.	(p) Marketing, farm and home.
(e) Tobacco and other special crops.	(q) Foods and nutrition.
(f) Home gardens and home beautification.	(r) Child training and care.
(g) Market garden and truck crops.	(s) Clothing.
(h) Fruits.	(t) Home management.
(i) Forestry.	(u) Home furnishings.
(j) Rodents and miscellaneous insects.	(v) Home health and sanitation.
(k) Agricultural engineering and home engineering.	(w) Community activities.
(l) Poultry.	(x) Miscellaneous.
- V. Outlook and recommendations, including suggestive program of work for next year.
- VI. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning or end of the narrative report.

STATISTICAL SUMMARY

To supplement the narrative part of the report, and in order that comparable State and National summaries may be made, it is necessary to include a statistical summary of the work in each county. The following form has been prepared to insure uniformity of reporting:

DEFINITIONS OF TERMS USED IN THIS REPORT

1. A program of work is a statement of the specific lines of extension work to be undertaken by the extension agent during a year or a period of years.
2. A plan of work is a definite outline of procedure for carrying out the different phases of the program of work. Such a plan provides specifically for the means to be used and the methods of using them. It also shows what, how much, when, and where the work is to be done.
3. A community is a more or less well-defined group of rural people with common interests and problems. Such a group may include those within a township, trade area, or similar limits. For the purpose of this report a community is one of the several units into which a county is divided for conducting organized extension work.
4. A project leader, local leader, or committeeman is a person who, because of special interest and fitness, is selected to serve as a leader in advancing some phase of the local extension program. A project leader may be either an organization or a subject-matter leader.
5. Demonstrations as contemplated in this report are of two kinds—method demonstrations and result demonstrations.

A method demonstration is a demonstration given by an extension worker or other trained leader for the purpose of showing how to carry out a practice. Examples: Demonstrations of how to can fruits and vegetables, mix spray materials, and cull poultry.

A result demonstration is a demonstration conducted by a farmer, home maker, boy, or girl under the direct supervision of the extension worker, to show locally the value of a recommended practice. Such a demonstration involves a substantial period of time and records of results and comparisons, and is designed to teach others in addition to the person conducting the demonstration. Examples: Demonstrating that the application of fertilizer to cotton will result in more profitable yields, that underweight of certain children can be corrected through proper diet, or that the use of certified seed in growing potatoes is a good investment.

The adoption of a farm or home practice resulting from a demonstration or other teaching activity employed by the extension worker as a means of teaching is not in itself a demonstration.
6. A result demonstrator is an adult, boy, or girl who conducts a result demonstration as defined above.
7. A cooperator is a farmer or home maker who agrees to adopt certain recommended practices upon the solicitation of an extension worker. The work is not directly supervised by the extension agent and records are not required, but reports on the success of the practices may be obtained.
8. A 4-H Club is an organized group of boys and/or girls with the objectives of demonstrating improved practices in agriculture or home economics, and of providing desirable training for the members.
9. 4-H Club members enrolled are those boys and girls who actually start the work outlined for the year.
10. 4-H Club members completing are those boys and girls who satisfactorily finish the work outlined for the year.
11. A demonstration meeting is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
12. A training meeting is a meeting at which project leaders, local leaders, or committeemen are trained to carry on extension activities in their respective communities.
13. An office call is a call in person by an individual or group seeking agricultural or home-economics information, as a result of which some definite assistance or information is given. A telephone call differs from an office call in that the assistance or information is given or received by means of the telephone. Telephone calls may be either incoming or outgoing.
14. A farm or home visit is a call by the agent at a farm or home at which some definite information relating to extension work is given or obtained.
15. Days in office should include time spent by the county extension agent in his office, extension conferences, and any other work directly related to office administration.
16. Days in field should include all days spent on official duty other than those spent in office.
17. Letters written should include all original letters on official business. (Duplicated letters should not be included.)
18. An extension school is a school usually of two to six days' duration, arranged by the extension service, where practical instruction is given to persons not resident at the college. An extension short course differs from an extension school in that it is usually held at the college or other educational institution and usually for a longer period of time.
19. Records consist of definite information on file in the county office that will enable the agent to verify the data on extension work included in this report.

GENERAL ACTIVITIES

Report Only This Year's Activities and Events that can be Verified

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report.

J.G. Hamaker	County Agr. Agent	10
(Checked)		(Months of service this year)
R.S. Ellis	Assistant County "	17 Days
R.S. Ellis	Co. Agricultural "	2 Months

2. County extension organization or association.

(a) Name Agricultural Advisory Council

(b) Number of members 34 (1) Men 34
(2) Women _____

3. Number of communities in county where extension work should be conducted 7

4. Number of above communities in which the extension program has been cooperatively worked out by extension agents and local committees 5

5. Number of different voluntary county or community local leaders or committeemen actively engaged in forwarding the extension program.

(a) Adult work (1) Men 34
(2) Women 9

(b) 4-H Club work (1) Men 2
(2) Women _____
(3) Older club boys _____
(4) Older club girls _____

6. Number of clubs or other groups organized to carry on adult home demonstration work 5

7. Members in above clubs or groups 45

8. Number of 4-H Clubs 10

9. Number of different 4-H Club members enrolled 222 (a) Boys 124
(b) Girls 98

10. Number of different 4-H Club members completing (a) Boys 95
(b) Girls 71

11. Number of members enrolled in 4-H Club work for:

	1st Year	2d Year	3d Year	4th Year	5th Year	6th Year and Over
(a) Boys	42	33	31	12	4	2
(b) Girls	35	27	24	8	2	2

12. Number of 4-H Club members according to age.

Age	10	11	12	13	14	15	16	17	18	19	20
Boys	20	12	18	14	19	19	13	7	1	1	
Girls	17	12	17	8	14	12	10	7	1		

¹ Report the total number of different boys or girls enrolled in club work. This total should equal the sum of the project enrollments reported on pages 8 to 9, less any duplications due to the same boy or girl carrying on two or more subject-matter lines of work.

GENERAL ACTIVITIES—Continued

Report Only This Year's Extension Administrative Results that can be Verified

13. Number of 4-H Club members in school	214	Out of school	8	13
14. Number of 4-H Club teams trained	(a) Judging	0	0	14
	(b) Demonstration	0		
15. Number of groups organized for extension work with rural young people above the 4-H Club age		0		15
16. Members in above groups	(a) Young men	0	0	16
	(b) Young women	0		
17. Total number of farm visits* made in conducting extension work		673		17
18. Number of different farms visited		329		18
19. Total number of home visits* made in conducting extension work		297		19
20. Number of different homes visited				20
21. Number of calls relating to extension work	(a) Office	376	177	21
	(b) Telephone	177		
22. Number of days agent spent in office		89		22
23. Number of days agent spent in field		214		23
24. Number of news articles or stories published*		15		24
25. Number of individual letters written		506		25
26. Number of different circular letters prepared (not total copies mailed)		18		26
27. Number of bulletins distributed		265		27
28. Number of radio talks made		0		28
29. Number of events at which extension exhibits were shown		0		29
30. Training meetings held for local leaders or committees	(a) Adult work	(1) Number	6	30
		(2) Total men leaders attending	96	
	(b) 4-H Club	(1) Number	11	
		(2) Total leaders attending	11	
31. Method demonstration meetings held (do not include meetings reported under No. 30)	(a) Number	23	85	31
	(b) Total attendance	85		
32. Meetings held at result demonstrations	(a) Number	8	200	32
	(b) Total attendance	200		
33. Tours conducted	(a) Number	1	8	33
	(b) Total attendance	8		
34. Achievement days held	(a) Adult work	(1) Number	1	24
		(2) Total attendance	23	
	(b) 4-H Club	(1) Number	0	
		(2) Total attendance	0	

*List as farm or home visit according to principal purpose of visit.

*Include county and State press, agricultural journals, and home magazines. Do not count those relating to selling of meetings only.

Seed Loan				20				126	23
				26				34	167

(The totals for these columns do not necessarily check with the information given on pages 4, 5, and 6, since one meeting, farm visit, circular letter, etc., may relate to two or more lines of subject matter.)

¹ Items "including the extension program" include all work incident to the collection of economic and social data as a basis for determining program, the conducting of program surveys, and the outlining of county, district, and community programs. Do not include work related to the execution of programs, as this should be reported under the projects above.

² Under "organization" include all work incident to maintaining extension associations, agricultural councils, home demonstration councils, advisory organizations, project committees, community committees, and the like not reported under building the extension program.
