

ACKNOWLEDGMENTS

I would like to thank my parents for their love and support, especially within my last three months of graduate studies. Without them, this day would not have been possible. I would also like to thank my entire family (Perkins, Hunter, Swann, and Helmy) for the good times in my life. And a very special thanks to Pedro M. Swann, Jr. for not allowing me to give up when the chips were down.

Special thanks to Jay H. Williams, PhD, for inviting me to join his muscle function laboratory and for being a great listener. Also, sincere thanks to Christopher Ward, PhD for his friendship, laboratory guidance and advice. I would like to thank Jay and Chris both for their patience and time.

Finally, I would like to thank the HNFE secretaries, Sherry Terry, Mary Taylor, and Sherry Saville, for all of their help in getting me where I needed to be or for some great laughs.
