

TABLE OF CONTENTS

ABSTRACT.....	ii
ACKNOWLEDGMENT.....	iv
TABLE OF CONTENTS.....	vi
LIST OF TABLES.....	ix
LIST OF FIGURES.....	x
CHAPTER 1 INTRODUCTION.....	1
1.1 Overview of Problem.....	1
1.2 Objectives of Research.....	2
1.3 Scope of Study.....	3
1.4 Content of Thesis.....	3
CHAPTER 2 LITERATURE REVIEW ON LIQUEFACTION AND GROUND DENSIFICATION FOR LIQUEFACTION MITIGATION.....	5
2.1 Liquefaction-Induced Failure Mechanisms.....	5
2.1.1 Loss of Bearing Capacity.....	5
2.1.2 Excessive Settlement.....	5
2.1.3 Lateral Spreading.....	6
2.1.4 Flow Failure.....	6
2.1.5 Ground Oscillation.....	6
2.1.6 Pore Pressure Generation.....	7
2.2 Ground Densification Techniques for Liquefaction Mitigation.....	8
2.2.1 Vibro-Compaction.....	8
2.2.2 Stone Columns.....	9
2.2.3 Vibratory Probe Method.....	9
2.3 Aggregate Pier Foundation System.....	10
2.3.1 Construction Process.....	10
2.3.2 Performance of Aggregate Pier for Seismic Considerations.....	12
2.3.2.1 Increase in Lateral Stress.....	13
2.3.2.2 Increase in Density of Soil.....	15
2.3.2.3 Increase in Stiffness Modulus.....	15
2.3.2.4 Improved Drainage.....	16
2.3.3 Case Histories.....	16
CHAPTER 3 LITERATURE REVIEW ON LIQUEFACTION ANALYSIS OF GROUND REINFORCEMENT SYSTEM.....	37
3.1 The Simplified Procedure for Liquefaction Evaluation.....	37
3.2 Baez and Martin Procedure.....	43
3.3 Goughnour and Pestana Procedure.....	45
3.4 Calculation Example.....	48

3.4.1	Simplified Procedure (Seed and Idriss, 1971).....	49
3.4.2	Baez and Martin Procedure (1993, 1994).....	50
3.4.3	Goughnour and Pestana Procedure (1998).....	51
CHAPTER 4 NUMERICAL MODELING.....		61
4.1	Overview.....	61
4.1.1	Sign Conventions and Units.....	62
4.1.2	Grid Generation.....	62
4.1.3	Boundary Conditions.....	63
4.1.4	Initial Conditions.....	64
4.1.5	Constitutive Model.....	64
4.1.6	Silent Boundary.....	64
4.1.7	Free Field Boundary.....	66
4.1.8	Damping.....	67
4.2	Earthquake Motions.....	68
4.2.1	Filtering.....	69
4.2.2	Baseline Correction.....	70
4.3	Dynamic Pore Pressure Generation.....	71
CHAPTER 5 LIQUEFACTION ANALYSES OF AGGREGATE PIER FOUNDATION SYSTEM USING NUMERICAL MODELING.....		81
5.1	Parameters Used in Numerical Analyses.....	81
5.1.1	Soil Parameters.....	81
5.1.2	Aggregate Pier Parameters.....	83
5.1.3	Water Parameters.....	84
5.2	Numerical Modeling.....	84
5.2.1	Grid Generation.....	85
5.2.2	Boundary Conditions.....	85
5.2.3	Initial Conditions.....	85
5.2.4	Constitutive Model.....	86
5.2.5	Damping.....	86
5.3	Earthquake Motions.....	87
CHAPTER 6 STUDY OF GROUND IMPROVEMENT USING AN AGGREGATE PIER FOUNDATION SYSTEM.....		102
6.1	Parametric Study.....	102
6.1.1	Comparison between SHAKE91 and FLAC.....	102
6.1.2	The Effects of Varying Moduli.....	104
6.2	Cases without an Aggregate Pier Foundation System.....	107
6.3	Cases with an Aggregate Pier Foundation System.....	109
6.3.1	The Effects of Soil Stratification.....	111
6.3.2	The Effects of Soil Properties.....	114
6.3.3	The Effects of Pore Pressure Dissipation.....	115
6.3.4	The Effects of Earthquake History.....	117
6.4	Shear Stress in Soil Matrix.....	118
6.5	Summary.....	119

CHAPTER 7 INTERPRETATION OF RESULTS OF NUMERICAL ANALYSES.....	210
7.1 Ground Acceleration.....	210
7.2 Excess Pore Water Pressure Ratio.....	211
7.3 The Shear Stress Reduction Factor.....	213
7.4 Implications for Design of Aggregate Pier under Seismic Loading.....	217
7.5 Conclusions.....	219
CHAPTER 8 SUMMARY, CONCLUSIONS, AND RECOMMENDATIONS.....	246
8.1 Introduction.....	246
8.2 Summary and Conclusions.....	248
8.2.1 Ground Acceleration.....	248
8.2.2 Excess Pore Water Pressure Ratio.....	249
8.2.3 Shear Stress in Soil Matrix.....	250
8.3 Recommendations for Future Research.....	252
REFERENCES.....	253
APPENDIX A DETERMINATION OF PARAMETERS USED IN FLAC ANALYSES..	262
VITA.....	278
