

Table of Contents

| | | |
|----------|--|-----------|
| 1 | Introduction. | 1 |
| 2 | Literature Review. | 5 |
| | 2.1 Access Control Security. | 5 |
| | 2.2 Analysis of System Errors. | 6 |
| | 2.3 Detection and Estimation Theory. | 8 |
| | 2.4 Open Research Questions. | 10 |
| 3 | Methodology. | 12 |
| | 3.1 Problem Statement. | 12 |
| | 3.2 The Effectiveness Model. | 14 |
| | 3.3 The SAFE Model. | 18 |
| | 3.3.1 Overview of the SAFE Model. | 18 |
| | 3.3.2 Development of the SAFE Model. | 20 |
| | 3.3.3 Minimization of the SAFE Model. | 24 |
| | 3.3.3.1 The GHC Algorithm. | 24 |
| | 3.3.3.2 GHC and the SAFE Model. | 26 |

| | | |
|----------|--|-----------|
| 4 | Results and Observations. | 29 |
| | 4.1 Results. | 29 |
| | 4.1.1 Generating Results. | 29 |
| | 4.1.2 Initial Conditions. | 31 |
| | 4.1.3 Computation Time of the SAFE Model. | 33 |
| | 4.1.4 Results of the SAFE Model. | 34 |
| | 4.1.5 The Optimal Solution. | 36 |
| | 4.1.6 Verification of the GHC Algorithm. | 36 |
| | 4.2 Observations and Discussion. | 37 |
| | 4.2.1 Local Optima versus Global Optima. | 37 |
| | 4.2.2 Discussion of the Different Detection Systems chosen by the SAFE Model. | 39 |
| | 4.2.3 False Alarm and False Clear Rates. | 41 |
| | 4.3 Final Recommendations. | 43 |
| 5 | Conclusion. | 44 |
| | Bibliography. | 47 |
| | Appendix A: Visual Basic Code for the SAFE Model. | 49 |
| | Appendix B: Breakdown of Values for Random Number, D. . . | 53 |
| | Appendix C: Complete Results of the Optimal Solution(s) for each Experimental Design. | 55 |
| | Appendix D: Graphs of the SAFE Model's Results. | 65 |
